## **Material and technical base**

603 A Laboratory Biology  
607A Cabinet Ecology  
611B Laboratory Chemistry  
1008 A Cabinet Design  
905 A Choreography Hall  
1110A Department of Natural Science and Sports

At the Kyzylorda University "Bolashak" there is an educational-field and health-improving center "Astaukol", as well as an agrobiological and scientific-experimental site "Balzhansai", the areas of which are 21 and 90 hectares. On the territory of the agrobiological and scientific experimental site "Balzhansai" there is a special laboratory, the area of which is 90m<sup>2</sup>, for conducting direct biometric analyzes on the collected and freshly harvested materials and preparing a collection of plants (herbarium) and insects (dummies) for the laboratory room of biology, necessary for carrying out laboratory and research work in the autumn-winter-spring time, in accordance with the curriculum.

## **Educational-methodical work**

The department maintains scientific and practical ties with higher educational institutions and research organizations within the framework of international cooperation:

- Kazakh Research Institute of Rice named after I. Zhakaeva.
- All-Russian Research Institute of Animal Husbandry (Moscow)
- All-Russian Research Institute of Beef Cattle Breeding (Orenburg)
- Kazakh Research Institute of Animal Breeding, Forage Production and Pastures (Almaty)
- Eurasian Agrarian University named after S. Seifullin (Astana)
- West Kazakhstan Agrarian Technical University named after Zhangir Khan (Uralsk)
- South-West Research Institute of Livestock and Plant Growing. (Shymkent)
- Kazakh National University named after al-Farabi (Almaty)
- Institute of Geography (Almaty)
- School No. 264
- №15 school-lyceum,
- School-lyceum №101 named after A. Muslimova
- School No. 140 named after Abylai-Khan

## **Scientific directions:**

- Biotechnology of animal reproduction. Endocrine hormones and the relationship with the ecology of the Aral Sea region
- Features of growth, development and productivity of many summer grasses in rice crop rotation in the Aral Sea region
- Improving the technology for the production of livestock products
- Study of production and biological characteristics of dairy cows in the Aral Sea region
- Results of phytomelioration measures on the drained bottom of the Aral Sea region
- Purification of Syrdarin water with natural sorbents
- Improvement of irrigation and drainage parameters for rice systems of Kyzylorda oblast.

- Geoecological aspects of the formation of toponyms of the territory of the Kyzylorda region
