

# **MATERIAL AND TECHNICAL BASE OF THE UNIVERSITY**

The material and technical base of the university corresponds to the goals and objectives of the university's mission, sanitary norms and fire safety rules, and the requirements of state mandatory education standards for the training of specialists with higher professional education. Great importance is attached to its development and strengthening, since the indicators of material and technical resources in the educational process characterize the potential of the university and are the guarantor of its development.

Currently, the educational institution Bolashak University is located in a beautiful building on the left bank of our city along the Syr Darya.

In 2017, construction began on a campus that meets modern requirements for university students, which has been in operation since 2019. Currently, students study in the main academic building, the investment value of which is 2 billion 234 563 000 tenge.

The material and technical base of the university consists of a 14-storey main academic building with an area of 21000 square meters, equipped with modern technologies with a total area of 11 hectares, a simulation center of the latest type, 2 dormitories with 800 seats, a sports and recreation complex with 2160 square meters, an atrium hall with 500 seats, 2 winter gardens, a reading room with 200 places and libraries with a rich electronic fund, a canteen for 300 seats, specialized laboratory bases for educational programs, 4 central greenhouses of 8 blocks, a television studio of journalism «Bolashak TV».

To form a full-fledged smart campus system of Bolashak University, the construction of the Bolashak Hall for 1100 seats is currently underway.

It is planned to build a house of professors, an arboretum, a medical clinic, an open-air atrium on the embankment, a cinema, a technopark for the implementation of a business incubator and research work of students, an intellectual school at the university and a youth complex.
